WISCONSIN PUBLIC SERVICE
COMMISSION

Administrative Law Judge Edward S. Marion
Public Service Commission of Wisconsin
P.O. Box 7854
Madison, WI 53606-7854

Dear Judge Marion:

I recently wrote to you requesting full party status in Docket No. 137-CE-139, concerning the American Transmission Company's application to construct a new 2138 kV line from the North Madison Substation to the Huiskamp Substation. Because of some clarifying materials I received from the Public Service Commission, I have decided that I wish not to participate as a full party and instead to participate in the Commission's proceeding as a member of the public. Please institute that change.

The shift in my position in relation to the proceedings should not be interpreted as representing any shift in my views: I do not believe that the proposed line is necessary—its necessity is a question that needs careful and objective investigation as does consideration of ways to conserve energy. I remain deeply concerned about the environmental impact of the proposed line. I hope that the number of form letters you received will give you some inkling of the widespread conviction among Madison's citizens that this line as well as other proposed ATC projects would damage rather than enhance the quality of life in Dane County.

Thank you for your attention.

Sincerely,

Lynn Keller
